

BAG FILTERS

F7-F8-F9 BAG FILTERS

Bag filters; It is manufactured with superior ultrasonic sewing technology. They provide maximum filtration with a long service life and low pressure loss. They are used as coarse final filters in air handling units. It can be produced in standard sizes as well as special sizes. Filter change can be done in a short time and simply.

Dimensions (mm)	287*592*535	592*592*535	287*592*635	490*592*635	592*592*635	287*592*700	592*592*700
Number of Pockets	4	8	4	6	8	4	9
Filter Surface	2	4,1	3,3	5	6,7	3,6	8
Air Flow (m3/h)	1.700	3.400	1.700	2.850	3.400	2.125	4.250
Initial Pressure (Pa)	60	60	60	80	80	105	105
Filter Material	Synthetic Fiber						
Frame Material	Galvanized						
Max. Temperature	90°C						
Filter Class	F7-F8-F9						
Flame Resistance	F1-DIN.53438						
Regeneration	No
