

HEPA FILTERS

PRECISION FILTERING SYSTEMS

HEPA filters; hospital, medicine, pharmaceutical, food, microbiology, chemistry sectors that require hygiene and are sensitive and stable. Laboratory, measurement and calibration to be kept used in centres. It is used in the manufacture of hepa filters.

The glass fiber used in the manufacture of HEPA filters is folded in mini pleats and placed in an MDF or aluminum case by increasing its strength with a hot thermo plastic separator. Full sealing is provided with the polyurethane gasket structure.

Dimensions (mm)	Air Flow m ³ /h	Filter Class	Pressure Pa (Min)	Pressure Pa (Max)	MPSS	@0,3 μ DOP	Filter Surface m ²
